

BALLESTAS ISLANDS BY YACHT

Nature, marine life & luxury

Enjoy an exclusive private yacht cruise on the Pacific Ocean and witness a natural spectacle of breathtaking beauty: the Ballestas Islands.

Situated opposite Paracas National Reserve, these three islands composed of soaring geological formations are inhabited by a raucous colony of sea lions, Humboldt penguins, pelicans, seabirds and other species that seek refuge here during their migratory journeys across the ocean, transforming the Ballestas Islands into an exceptional destination for birdwatching and wildlife observation.

During the boat ride to the islands, it is possible to view on a sand-covered hill overlooking the bay the geoglyph associated with the Nasca Lines and known as the "Candelabro".
